

Nicole's Story

January, 2009

I've abused drugs and alcohol since a young age of 15. My mother and my father are both addicts and alcoholics. I grew up in a dysfunctional and co-dependant household. My addiction took me to horrible insane places. I ended up pregnant, and I couldn't stop drinking and using. The Prop. 36 program sent me to residential treatment until two months post-partum. It saved my life, I am so happy now and grateful to be clean and sober. I am continuing to build a support group and stay connected. Today, I choose life.
